

# WE GUARANTEE THE QUALITY OF OUR SYSTEMS AND THEIR OUTPUT

## THE SOLARWATT EXTENDED PRODUCT WARRANTY

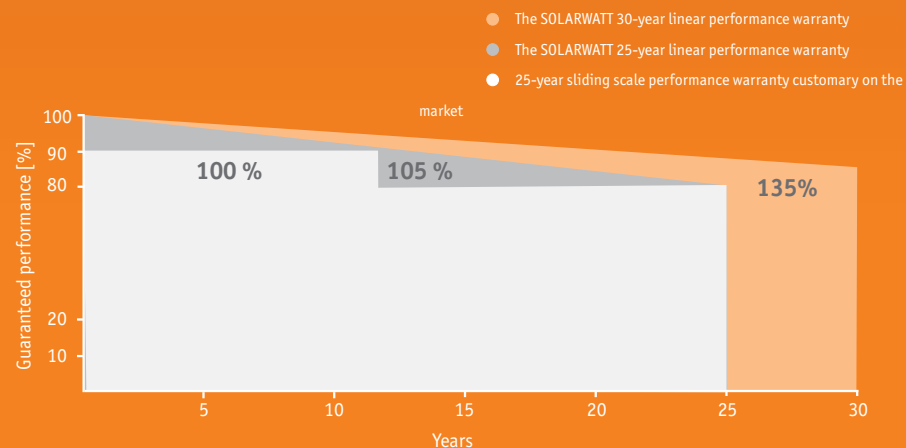

With SOLARWATT Full Coverage, your system is fully protected against external influences such as weather-related damage, theft, or operator errors. And because we are convinced of the excellent workmanship of our

products, we have also extended the product warranty for your SOLARWATT modules\*. For maximum protection.

## THE SOLARWATT LINEAR PERFORMANCE WARRANTY

We also guarantee that our systems deliver consistently high returns. Specifically, in the first year we guarantee at least 97% of the measured minimum output. In the following 29 (24) years, output must not decrease by

more than 0.35% (0.71%) per year. In the 30th year (25th year) the output must still be at least 87% (80%)\*. Otherwise, we will replace the missing output for you.

\* All information as per SOLARWATT GmbH's Special Warranty Conditions.

# SOLARWATT FULL COVERAGE

COMPREHENSIVE PROTECTION FOR YOUR SOLAR POWER SYSTEM

## SOLARWATT FULL COVERAGE: SIMPLY TWICE THE GUARANTEE.

Anyone who decides to install SOLARWATT is protected on two levels: Your solar power system is a solid investment for the future while SOLARWATT's unique insurance and warranty benefits will ensure that you sleep soundly.

SOLARWATT Full Coverage not only insures theft and weather damage. It will also pay out if your solar power system

cannot generate any output due to damage or if it delivers less output than expected.

And the best thing is that SOLARWATT Full Coverage is automatically part of the package for all modules in the SOLARWATT ORANGE Line and for the new glass-glass generation.

## ALL-RISKS INSURANCE: WE WILL PUT EVERYTHING RIGHT AGAIN IN THE EVENT OF DAMAGE OR LOSS. YES, EVERYTHING!

The insurance will cover the necessary repairs in the case of partial damage, i.e. if your solar power and/or storage system can still be repaired. In the event of a write-off, the insurance will pay the price for a new system, com-

pensating for any extra charges incurred, such as packaging and assembly costs. Only planning and regulatory approval costs are not covered.\*

### THE INSURANCE COVERS DAMAGE PARTICULARLY IN THE EVENT OF:

- ▶ Mechanical and electrical incidents, such as overcurrent, overvoltage and short circuits
- ▶ Failure of measurement instruments, control systems or safety devices
- ▶ Weather-related incidents such as hail or lightning
- ▶ Theft, burglary, robbery or looting

### IF DAMAGE OCCURS, THE FOLLOWING COSTS ARE COVERED UP TO €100,000:

- ▶ Clean up, decontamination and disposal costs
- ▶ Costs for overtime and work on Sundays, public holidays or at night.
- ▶ Costs for groundwork, paving, masonry, chiseling and scaffolding assembly.

## OPERATION INTERRUPTION INSURANCE: WE WILL ALSO MAKE UP FOR HOURS OF SUNSHINE MISSED.

SOLARWATT Complete Cover guarantees compensation for loss of power yields if your solar power system cannot function properly in the event of damage, because important components were stolen or the system was damaged, for example.

Compensation is paid based on the type of malfunction from the first day of the malfunction and up to a maximum of one year.

## REDUCED OUTPUT INSURANCE: BAD WEATHER? ASK FOR COMPENSATION.

If 90% of the annual energy yield predicted in the output forecast is not generated due to lower solar irradiation, then you will benefit from the minimum earnings insurance included in SOLARWATT Full

Coverage. In such a case, the insurance will cover the difference between guaranteed annual output and the actual output. This means up to 50 % of the forecast annual energy output!\*

## GOOD TO KNOW:

The Full Coverage insurance package applies to SOLARWATT rooftop systems up to 1,000 kWp nominal power and for all SOLARWATT CARPORT, VERANDA and FACADE SYSTEMS.\*\* At [www.solarwatt.de](http://www.solarwatt.de) we also provide a list of all insured inverters.

What's more, Full Coverage also insures other key components in your SOLARWATT system. The table shows how SOLARWATT insurance and warranty benefits increase when you acquire Full Protection.

	SOLARWATT Glass-glass-Modules	SOLARWATT Glass-Foil-Modules	SOLARWATT CARPORT/VERANDA/FACADE SYSTEM
Service interruption insurance	X	X	X
Minimum yield insurance	X	X	X
All-risk insurance	X	X	X
Extended product warranty	30 years	12 years	30 years <sup>2)</sup>
Extended performance warranty	30-year linear	25-year linear	30-years linear <sup>2)</sup>
Cost sharing if a SOLARWATT system inverter is used <sup>1)</sup>	75 euros	75 euros	75 euros

1) Applies to the first 3 years  
2) The listed warranty periods refer to the PV generator

Insurance coverage starts on the day that your SOLARWATT specialist fitter puts the solar power system into operation for the first time.

SOLARWATT pays your Full Coverage premiums for the first five years. After that, you will receive an attractive offer from the insurance company to extend the policy.

\* This brochure is for information purposes only. The only information which is definitive is the information you received together with your insurance certificate relating to insurance coverage, customer information and instructions on the correct procedure in the event of loss or damage.  
\*\* Special conditions apply to Italy: for rooftop systems up to 20 kWp nominal power and for all SOLARWATT CARPORT, VERANDA and FACADE SYSTEMS.

## ONLINE ACTIVATION

Full Coverage becomes valid as soon as you activate it online. For more information, please ask your installer! He is familiar with all the insured components and will help you

through the online registration at [solarwatt.de](http://solarwatt.de). Also talk to your installer about a maintenance contract for your solar system so that everything runs smoothly!
